ADEQUATE ELECTRICITY SUPPLY

Probably the most overlooked requirement for your event, You dont want the inflatable attractions to deflate while being used. You dont want the P.A. System to go quiet, and most important of all you dont want the beer cooler to stop. All this can be avoided if you plan ahead, Our events planning team will advise you on the power requirements you require to run your event without a hitch. We employ locally registered and qualified electricians to liase with your team, they will advise you on your requirements and of course install your electric distribution boxes. Shown on the left is a typical electric box that will supply safe electricity it is connected to the supply that Germans call "strong electricity."
